

Creating a Page in the Page Editor

Log in to your FormWeb Editor > Pages > Click on +Add a new page

Type in the Visual Editor just as you would in a word processing software (i.e, MS Word, or Pages). You may also copy/paste from a document you've already created in another software.

Tips:  COPY: CTRL+C | CUT: CTRL+X | PASTE: CTRL+V | SELECT ALL: CTRL+A

Paste NOTE: If you get this message, use keys CTRL+V to paste
Your browser doesn't support direct access to the clipboard.

You can't change the font selection, but you can change the size, bold, italicize, underline, subscript, and superscript the text of your page.

Show 50

of entries/page can be increased with drop down arrows

Action	ID	Title	Link Title	Link
Update Delete	12	Nursing	Nursing	Go to page
		Drug Information	Drug Information	Go to page
		Drug Shortages & Recalls	Drug Shortages & Recalls	Go to page
Update Delete	17	Formulary Information	Formulary Information	Go to page

Each row is a page. Each page creates a link on your Formweb site, which can be found in the "Link" column.

Another option for sharing information is to save a Word document as a PDF file. That file can be uploaded to our server or to your intranet, then linked to from a document or within a drug.

1. Uploading a PDF file and linking to it is covered in another document.
2. Creating a page that is formatted in tables is covered in another document.
