# FMOLHS System P&T Recommendations:

## Tetracyclines – UPDATE

- AMS recommendations - add tetracycline to formulary with restriction for treating *H. pylori* only.
- It is part of bismuth quadruple therapy which is now a guideline recommended first-line treatment option for *H. pylori*.

# FMOLHS System P&T Recommendations:

## Anti Hemorrhagic Agents – UPDATE / Anticoagulant Reversal Class Review

- Given the increased risk of thrombotic events without evidence of a clinical benefit that outweighs this risk, FDA rejection of full approval, and increased cost compared to the current formulary agent, 4 factor – PCC, we do not recommend addition of andexanet alfa to system formulary.

### ANTIHEMORRHAGIC AGENTS - UPDATE
