General rules (Approved generally by system peds med safety, and other peds groups)

*(PEDS)

*call all of these oral liquid

*route standardization - no default route, 5 buttons with routes

*Standardize conc./products/units/ TALLman lettering

*# - not for neonates – default admin instructions.

*mg/kg dosing default, but assess per med

*10% max dose alert, evaluate per med; new Peds ERX if necessary

*Compounding designator – most likely CNR
