

## HOSPITAL FORMULARY REPORT

MAY 2025

### **Proposed Additions**

prazosin 1mg capsule (PMHU request)

risperidone 1mg tablet (PMHU; addition to optimize available dosage strengths)

filgrastim-sndz (Zarxio) as preferred biosimilar for inpatient filgrastim

- Preferred outpatient filgrastim biosimilar determined by third party approval.

### **Proposed Deletions**

triamcinolone ointment (alternative topical steroid on formulary; removed from extravasation protocol)

benzoin tincture bottle (Steri-Strip benzoin tincture on formulary)

### **Critical Shortages**

None

### **Non-formulary Requests**

cariprazine

- Indication: Antipsychotic for PMHU patients
- Recommendation: Add to formulary due to frequent request as continued home medication

dalbavancin

- Indication: Definitive treatment for endocarditis
- Recommendation: Keep non-formulary status. Formulary option for empiric treatment of endocarditis available. Order patient specific treatment as needed.

fidaxomicin

- Indication: Recurrent *C.difficile* infection
- Recommendation: Monitor non-formulary requests. Consider formulary addition if continued need. Formulary option for initial *C.difficile* treatment available.

praziquantel and albendazole

- Indication: Rare parasitic infection
- Recommendation: Keep non-formulary status. Order patient specific treatment as needed.
